

EXPERIMENT 3

IDENTIFYING CONSTANTS AS INTEGER OR REAL

Aim: Implement a Transition Diagram for Identifying Constants and Classifying them as Integer or Real (floating point constant)

Design:

Algorithm:

1. Read first character.
2. If digit
 Go to S1
 Else
 Reject.
3. Continue reading digits.
4. If '.' appears
 Go to S2.
5. Next symbol must be digit.
6. Continue reading digits.
7. If accepted in S1
 Integer
8. If accepted in S3
 Real

Program:

Output:

Result:
